# ANTONIO DI PINTO

---

## SUMMARY

I'm a senior full-stack developer. I have 10 years experience in web development, starting from old but gold **PHP** to a more recent **Golang** and **Typescript** (Nest.js/Angular/**Ionic**).

I like to build software and be hands-on for every aspect, especially for performance and stability.

I'm also passionate about aviation, I'm studying to get my Private Pilot License.

You can check my **GitHub** profile here <https://github.com/antoniodipinto>

Or if you prefer, you can check my other online profiles here <https://intouch.link/@antoniodipinto>

## RIGHT NOW

I work as a freelancer, developing mostly **Nest.js** and **Ionic** projects, and helping clients to set up **scalable architectures** with on-premise resources.

I like to invest my time to learn new technologies and to create personal projects like **AirPreneur** (<https://airpreneur.app/>) and **InTouch.Link** (<https://intouch.link/>)
